

Fully automatic laminating machines

with automatic film cutting equipment

sheet width 1000 – 2500 mm

sheet length min. 500 mm

sheet thickness 0,50 – 8,00 mm (standard) up to 200 mm (special construction)

a rigid welded and screwed construction with steel tubes

3 upper film axles

banana roll for bubble-free and wrinkle-free lamination

1 pair of rubber-coated ingoing rolls

1 pair of rubber-coated laminating rolls

height adjustment by spindle type elevating gear box, hand wheel and locator

drive with AC-gear box motor with frequency changer

electro magnetic clutch, teeth belt drive

speed 5 – 50 metres / minute

1 pair of rubber-coated outgoing rolls

control: Siemens S7 300 with touch panel

Fully automatic laminating machines

foil laminator, standard

*foil cutting between the sheets
+/- 0,00 mm*

automatic rewinding unit of residual foil strips

foil cutting with knife

*or alternatively:
perforation, disc knife, or the like*

Options:

bottom film axle for double-sided lamination

film axle carousel with up to 6 film axles

foil axles with pneumatic extension shafts and tilting bearings

foil heating equipment when establish machine in non-heated factory

custom-built special constructions

easy change of foil rolls

good accessibility

foil trimming integrated
